

Bietigheim-Bissingen, June 2023

Product discontinuation / Last order notification

Temperature controllers named RES-4xx and UPT-6xx
Temperature gauges ATR-x
Potentiometer PD-5 and PD-10

Dear Customers,

We are continuing our strategy "from analogue to digital" in our product portfolio and for this reason we are making the following adjustments:

The temperature controllers named RES-4xx and UPT-6xx will be removed from our portfolio during the year. Please refer to the table below for the digital successor and information on the last ordering option.

Due to the tense situation on the electronic component market, we ask for your understanding that we cannot promise any delivery quantities for orders of discontinued products that significantly exceed the usual order quantities up to the last order date.

Our focus is on the further development of the RES-5xxx and UPT-6xxx series to provide you with the best possible control-side integration into your machine.

Please note that we are also removing the ATR-x and Potentiometer PD-5 and PD-10 analog temperature indicators from our portfolio until September 30, 2023.

If you have any questions, please do not hesitate to contact us via email: info@ropex.de
We will be glad to help you!

You can find the conversion manual for your product in our download area of the website or via the following link: <https://www.ropex-group.com/downloads/>

Best regards

Sebastian Gehring
Product manager for system components
